As you know, JPS is an open-access journal. This means that readers can download articles without any payment or sign up process. In the Figure 1, monthly download and total download numbers of articles¹ are shown for the September 2007 – August 2008 period. From the figure, it is easily seen that monthly download numbers increased at issue release months: January, April, July and October. At the end of the August 2008, total download number of articles approached to 2400. This means that –

¹ PDF files of the articles

roughly— every article is downloaded more than 130. With the help of Google Scholar and a future DOAJ² listing this large number of downloads can be double.

JPS is a forming open-access non-profit journal. JPS is indexed by: Zeitschriftendatenbank (ZDB) and Elektronische Zeitschriftenbibliothek (EZB). Full text is indexed by Google Scholar.

Quarterly published, open-access, non-profit scholar journal JPS, (ISSN 1307-8194) accepts original research articles, letters and technical reports in various fields of research in physics and astrophysics. Contribution is open to all for graduate and undergraduate physics students and researchers of all nationalities.
